**BDT 10,000/- +VAT**

#### PROGRAM OVERVIEW:

Blockchain technology is profoundly changing many aspects of modern world, such as how the internet works & represents a fundamentally new way to transact business. They usher in a robust and smart next generation of applications for the registry and exchange of physical, virtual, tangible, and intangible assets. This program will explore the potential for Blockchain technology to redefine the way the procurement & supply chain activities are created and run.

#### COURSE CONTENT

- Blockchain origin & Objectives
- What is Blockchain, exactly?
- How does the Blockchain network works?
- What are the key benefits of Blockchain Technology?
- What are its uses in Procurement & Supply Chain?
- P2P Systems
- Hashpointers & Data Structures
- Advanced Smart Contract
- Mining Explained
- Understand its uses in Procurement & Supply chain.
- Blockchain Challenges

#### LEARNING METHODOLOGIES

ISM-INDIA's training methodology and approach to transferring knowledge is constantly reviewed and updated. We ensure that we bring the most up to date teaching methods and techniques to our courses. We strongly believe that actively engaged participants will absorb and retain knowledge far more successfully than those who attend lecture style courses. Where material is contextualised and relevant to the participants' own experiences, understanding is significantly improved.

#### AWARDS OF CERTIFICATE

- All the participants will be honored with certificate of participation after the training.
- The program will be followed by an online test and the candidates will be awarded with the title of ABP (Accredited Blockchain Professional) on completion of the same.
